DETAILED ACTION

The disclosure is objected to because of the following informalities: On page 3, line 2 should end with a period. On page 3, line 14, "13" should read -123--.

Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Chubb (975).

Chubb teaches a key comprising a blade 16, a bow 18, a hole 40 along the periphery of the bow to receive an ornamental element 22 (column 4, lines 1-3), a means 24 which is transparent to retain the ornamental element 22 in the hole 40, a bottom wall 30, and force-fitting means 72, 74, 76, 82, 84, 80, 78 to retain the lid 24 in place, which also allows the means 72, 74, 76, 78, 80, 82, 84 to be released if desired to remove the ornamental element.

Claims 1 and 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Bolton (542).

As seen in the figures 21-25 embodiment, Bolton teaches a key comprising a blade, a bow 204 having a hole along the periphery of the bow to receive an ornamental element 230 in the hole, and retaining means defined by a transparent molded casing 228 that

Art Unit: 3676

accommodates the bow (see column 10, lines 37-41). It is also noted that a molding step or method is not being claimed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
